

HORIZON 2020 RESEARCH AND INNOVATION FRAMEWORK PROGRAMME OF THE EUROPEAN ATOMIC ENERGY COMMUNITY

Nuclear Fission and Radiation Protection 2018 (NFRP-2018-4)

Project acronym: **SANDA**

Project full title: **Solving Challenges in Nuclear Data for the Safety of European Nuclear facilities**

Grant Agreement no.: **H2020 Grant Agreement number: 847552**

Workpackage N°: **WP6**

Identification N°: **D6.1**

Type of document: **Deliverable**

Title: **SANDA - WEB**

Dissemination Level: **PU**

Reference:

Status: **VERSION 1**

The SANDA WEB is composed by two groups of web pages: a set of web pages hosted at CIEMAT computers and developed using the DRUPAL system and a set of INDICO web pages hosted by CERN.

The main entry point is the CIEMAT hosted web pages. At present it can be reached at the link <http://win.ciemat.es/sanda/>

We are negotiating to have an independent domain for SANDA not depending on CIEMAT, and the link for the entry point will change when available.

This part of the SANDA Web includes:

- General information
- Contractual documents
- News related to the project
- A calendar of events related to the project
- A library (searchable data-base) of journal papers, presentations, deliverables, and other documents related to the project
- Links to other web-pages related to the project
- Access to open data repositories

Most of this WEB is public and can be read without any limitation and without any login. Only some pages and documents at preliminary state are restricted and require to login using a password provided to the SANDA participants. A generic account (SANDA-user) has been created and the password is provided to the members of the project allowing to view all elements of the WEB.

The second part of the SANDA WEB is provided by the CERN INDICO system, dedicated to the organization, management, provide videoconference support and storage of the presentations for complex conferences, workshops and meetings. Taking advantage that CERN is one participant on the SANDA project, SANDA has been allocated the status of "project" with the corresponding web structure. This set of web pages is open and can be reached from the link: <https://indico.cern.ch/category/11566/>. This link and direct links to some events or documents in this INDICO web structure are directly available from the main SANDA WEB hosted at CIEMAT.

The SANDA INDICO has been used already for the kick-off meeting, and it is possible to find the agenda of the meeting, the pdf files of each presentation and the minutes of the meeting.

The detail content of the web can be better observed in the web directly.
